### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 1-7 rejected under 35 U.S.C. 103(a) as being unpatentable over Crisci US 4,230,229 in view of Magnusson US 4,227,619.

Crisci '229 fails to teach the score lines extending across the top wall.

Magnusson '619 teaches it is known to extend score lines across a top wall to provide a further indication of tamper evidencing.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the closure cap of Crisci '229, extending the score lines across the top wall, as taught by Magnusson '619, motivated by the benefit of providing means to destroy the closure cap and provide visual evidence of tampering. Examiner notes the reference does not teach the cap to be reapplied.

Assuming it were to, it would still be obvious because Magnusson '619 teaches it is known to form such caps to prevent reapplication.

3. Claims 8-10 and 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crisci US 4,230,229 in view of Magnusson US 4,227,619 as applied above, and further in view of Kline US 6,360,908.

Kline '908 teaches a threaded bung closure in figure 11, which is protected by a tamper evident snap on closure. The cap of Crisci '229 as modified above could be applied and would perform equally well at providing tamper evidencing.

Art Unit: 3727

It would have been obvious to one having ordinary skill in the art at the time the invention was made to apply the closure cap of Crisci '229, as modified above, to the bung closure of Kline '908, motivated by the benefit of providing tamper evidencing of the container.

## Response to Arguments

4. Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James N. Smalley whose telephone number is (571) 272-4547. The examiner can normally be reached on M-Th 9-6:30, Alternate Fri 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Nathan Newhouse can be reached on (571) 272-4544. The fax phone number for the organization where
this application or proceeding is assigned is 571-273-8300.
